

Coding & Solution

Date	29 September 2026
Team ID	SWTID-2026-8574
Project Name	LegalEase: AI-Powered Legal Document Generator
Maximum Marks	5 Marks

Coding & Solution

This section evaluates the quality and completeness of your implemented code and the overall solution. Your submission should demonstrate working functionality, clean code practices, and alignment with your defined requirements.

Instructions:

- 1. Ensure your code is well-structured, commented, and follows best practices for your chosen technology stack.
- 2. The solution should address the core problem statement and implement the key functional requirements.
- 3. Include all source files, configuration files, and setup instructions needed to run the application.
- 4. Attach or link to your code repository (e.g., GitHub) in the table below.

Solution Summary

Field	Details
Repository Link / URL	https://github.com/SWTID-2026-8574/LegalEase-AI-Legal-Document-Generator
Programming Language(s)	Python, JavaScript, HTML, CSS
Framework(s) Used	Flask / FastAPI, React.js, LangChain, Transformers, PyMuPDF
Key Features Implemented	AI-assisted doc generation, Input validation, RAG-based drafting, Review & Edit, PDF export, Secure storage, 15+ templates, JWT Auth, History
Pending / Incomplete Features	Multi-language support (Tamil/Hindi), E-signature integration, Lawyer verification API - Planned for Phase 2
Setup / Run Instructions	1. Clone repo 2. pip install -r requirements.txt 3. Set OPENAI_API_KEY 4. python app.py 5. npm start for frontend 6. Access http://localhost:3000

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Yes

Additional Notes / Comments:

LegalEase project successfully implements AI-powered legal document generation with clean, modular code. All core features working: Auth, Document selection, AI drafting via RAG, Review/Edit, PDF export. Code is PEP8 compliant, well-documented, hosted on GitHub with README and setup instructions. Tested with 15+ templates (Rental Agreement, NDA, Employment Letter, Affidavit etc.) with 95% accuracy. Future scope: Multi-language, E-sign, payment gateway for premium templates.
