

Data Flow Diagram

Date	29 September 2026
Team ID	SWTID-2026-8574
Project Name	LegalEase: AI-Powered Legal Document Generator
Maximum Marks	2 Marks

Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through the LegalEase system between the user, processes, AI resources, and data stores.

DFD Symbol Legend

Symbol	Name	Description
Oval / Rounded shape	External Entity	A person or system outside the project that sends or receives data, such as the User.
Rectangle with numbered header	Process	An activity that transforms incoming data into outgoing data, such as validation or AI generation.
Rectangle (solid fill)	Data Store	A place where information, templates, or generated documents are held for later use.
Labeled arrow	Data Flow	Movement of data between entities, processes, and data stores, labeled with the data being passed.

Example – LegalEase Data Flow

LegalEase Data Flow Diagram – Explanation

Process	Data Flow / Description
1. Document Request & Validation	The user selects a document type and enters the required details. LegalEase validates the submitted information.
2. AI Document Generation	Validated information is combined with approved legal-document templates and AI-assisted drafting rules to create a structured draft.
3. Review & Edit	The generated draft is displayed to the user for review and correction before final output.
4. Storage	Relevant user/document information and generated files can be stored for later access, subject to the application's privacy and security controls.
5. PDF Output	The reviewed document is formatted and generated as a downloadable PDF.
